

B.B. Factors That Influence Attention for Learning

Choices

Vs.

Required

Provide choices: content, timing, **work partners “2”**, **projects**, process, environment or resources.

Directed 100%, no student input, resources restricted-for example, working alone.

Relevant

Vs.

Irrelevant

Make it personal: relate to family, neighborhood, city, health, etc.

Impersonal, useless, out of context, and done only to pass a test.
